

Curriculr Usability Testing

As part of my final major project, I need several people to interact with my prototype of a web application I've created. The prototype is for a new virtual learning environment, where teachers can create teaching material for their classes, giving pupils and parents access to them anywhere, anytime.

Instructions:

1. Go to <https://edward2.solent.ac.uk/~sjohns/curriculr/>. A box will appear, asking you to login.
2. Login with the username: ##### and password: #####
3. Complete the list of tasks below, ticking them off as you go or after all tasks are completed.
4. Respond to the statements as to how far you agree or disagree with them.

Before you begin:

- You can do this on a desktop, laptop, tablet or mobile, but it should have the blue colours shown on the image below.
- Not everything on the site is clickable and operational.
- When you create or change something, it's not actually being changed.
- To login to the teachers area, you'll need to use the Username: Robinson123 and Password: Robinson123.

I was unable to leave a comment on the ISO Network Model topic and the other sections I have left blank were not able to be completed.

I was able to click onto reply to another comment but it wouldn't save.

I was able to click the delete button on the current topic but no confirmation as to whether it was completed or not.

Unsure what Option 19 is but i may have missed something on the first page.
